

## GRANDFLASH GF CA Activator

### Description:

GRAND FLASH curing accelerator for even faster curing of GRANDFLASH GF CA GLUE rapid adhesive.

- Economical
- Ideal for rapid adhesives with higher viscosities
- Easy to use
- Supplied in practical spray bottles

The values are average values. They serve merely for your information, but assume no warranty.

### Physical Properties:

Composition:	Organic substance in a soluble composition
Color:	Clear
Viscosity (20°C – mPa.s):	1 – 2
Specific gravity (20°C – g/ml)	0,8 (20°C – g/ml)
Flash Point (ISO 2592):	0°C
Vapour pressure 25°C	50 mbar
toxicity:	TLV 270 ppm
Responsiveness on the surface:	24 hours
Shelf live:	1 year

### Application:

GRANDFLASH GF CA activator is used where increased cure speed is required. The application can be both before, during and after the bonding process. Through the application of our GRANDFLASH GF CA activator improves the fixture time of your application with cyanoacrylate adhesives significantly. Typical applications include securing various materials such as metal, glass, plastic, etc., whenever a quick fix between close fitting parts is needed.

### Packing units:

150 ml Sprays

Art-Nr.: GFCAA.Y150
